

Nawres Ben Rhouma

Software Engineer at MaibornWolff · Backend Engineering, Cloud & Platform, AI-assisted development

benrhoumanawres7@gmail.com · linkedin.com/in/nawres-ben-rhouma21 · github.com/nawresbenrhouma · Tunis, Tunisia · remote

Open to remote, part-time roles

Summary

Backend Software Engineer with Java expertise (Spring Boot, Quarkus, REST, GraphQL, SQL), expanding into Azure platform engineering, Infrastructure as Code and AI-assisted development. Three-plus years at MaibornWolff on client and internal projects in agile, cross-functional teams. Known for taking on testing, onboarding, documentation and knowledge sharing beyond the core role.

Experience

Software Engineer · MaibornWolff

Nov 2022 – present

Backend development with Java, Spring Boot and Quarkus; REST and GraphQL APIs; SQL; Docker, Kubernetes and CI/CD; Azure and Infrastructure as Code; AI-assisted development.

MSR PolyCTRL · Software Engineer (Fullstack)

Aug 2026 – present

Java · Fullstack

- Current engagement: fullstack development on the PolyCTRL implementation for MSR-Electronic.

Beiersdorf Shared Services · Copilot Studio pilot

Mar 2026 – May 2026

Microsoft Copilot Studio · Power Automate · Power Platform

- Joined without prior hands-on experience in the stack; trained and became productive within a short timeframe.
- Owned documentation: step-by-step guides and version comparisons.
- Supported deployments and colleagues' meetings.

T WebPortal · Backend Engineer

Feb 2024 – Jan 2026

Java · Spring Boot · GraphQL · REST · Azure · Azure Cosmos DB · MySQL · GitLab CI/CD

- Backend development and maintenance in an agile, cross-functional team.
- Supported release testing before production deployments; onboarded a new backend colleague.
- Hosted retrospectives and knowledge-sharing sessions; supported the Product Owner with Scrum meetings.
- Covered frontend tasks when needed; applied Claude Code to improve readability in older repositories.
- Co-presented the project at a JAT event to MaibornWolff and client leadership.

Travel App • Fullstack Developer & Scrum Master

Jan 2023 – Nov 2023

Quarkus • Angular • PostgreSQL • Azure AD • AKS • ArgoCD • GitLab CI/CD

- Internal business-travel tool: employees submit requests, office managers review and approve them.
- Team of two to four; carried most of the development across backend, frontend and the GitOps deployment on AKS.
- Ran the Scrum process; requirements engineering and usability evaluation with the users.

Engineering Intern • 3S

Jul 2022 – Aug 2022

Set up an Infrastructure-as-a-Service solution with CloudStack for managing and deploying virtualised resources. Cloud infrastructure, Linux.

Immersion Intern • Dotcom (TravelEase)

Jul 2021 – Aug 2021

Developed key features of a transportation application for traveller transfers. Java, MySQL.

Selected Projects

Consummi Tounsi • ESPRIT academic project

E-commerce platform supporting local commerce in Tunisia. Architecture, backend and frontend, deployment to Azure Kubernetes Service. Spring Boot, Angular, MySQL, Docker, Kubernetes, AKS.

Skills

Backend	Java, Spring Boot, Quarkus, REST APIs, GraphQL, MySQL / SQL, API design, microservice-oriented architecture
Cloud & Architecture	Microsoft Azure, AKS, Azure Landing Zones, Virtual WAN, hub-and-spoke, Site-to-Site VPN, Private Endpoints / Private DNS, governance and security
DevOps / IaC	Docker, Kubernetes, Terraform, OpenTofu, Azure Verified Modules, GitLab CI/CD, GitHub Actions, ArgoCD
AI-assisted	Claude Code, agentic coding, Microsoft Copilot Studio, Power Automate, Power Platform
Also	Angular, TypeScript (learning), Agile / Scrum / Kanban, clean code, documentation, knowledge sharing

Certifications & Learning

Completed: Microsoft Azure Fundamentals (AZ-900); Microsoft Copilot Studio & Power Platform training; Microsoft Agent Academy; MaibornWolff Agentic AI training; Agentic Coding School.

In progress: CKA and CKAD preparation; Terraform / OpenTofu; Azure Landing Zones and Azure Verified Modules; Azure networking, governance and security.

Education

Master's degree in Cloud Computing • ESPRIT, Tunis

2022
